

**SUMMARY**

- I like solving challenging problems using machine learning.
- Interested in practical applications of AI and machine learning related to deep learning, natural language processing, recommender systems, optimization, reinforcement learning, and evolutionary computation.
- Bachelor's degree in computer science and master's degree with an emphasis on mathematical optimization.

**EXPERIENCE**

2018–present

**Research Scientist.** Amazon, Canada.

- Working on natural language understanding and entity resolution in Alexa.

2017–2018

**Senior Data Scientist.** Canopy Labs, Canada.

- Led the development of recommender systems and customer propensity models using Spark, PyTorch, Keras, TensorFlow, scikit-learn, and xgboost.
- Built recurrent neural networks for predictive customer analytics based on the customer's historical sequence of actions.

2015–2017

**Data Scientist.** Canopy Labs, Canada.

- Developed large-scale recommender systems for different industries such as online retail and travel. Participated in the definition of the business metrics as well as the design, implementation and evaluation of the systems in production.
- Used technologies such as Spark (with Python and Scala), Mesos, YARN, Amazon EMR, S3, and MongoDB.

2013–2015

**Research & Teaching Assistant.** York University, Canada.

- Designed and implemented reinforcement learning techniques to optimize the user interaction in configuration processes.
- Proposed methodologies to improve search heuristics on multimodal optimization problems.
- Implemented scientific software in Python (using NumPy, pandas and SciPy), R and MATLAB/Octave.

2011–2013

**Research Assistant.** Institute of Cybernetics, Mathematics and Physics, Cuba.

- Developed new estimation of distribution algorithms (EDAs) using copulas and vines to model the probability distributions.
- Implemented a group of R packages available on CRAN, and a C library for dependence modeling using vines.

**EDUCATION**

2013–2015

**Master's degree, Information Systems & Technology.**  
York University, Canada.

- *Thesis*: Efficient Calculation of Optimal Configuration Processes.
- *Selected Courses*: Mining of Massive Datasets, Advanced Information Retrieval Systems, Introduction to Computational Linguistics.

2014–2015

#### **Data Science Specialization.**

A non-credit series offered by Johns Hopkins University through Coursera.

- *Selected Courses*: R Programming, Getting and Cleaning Data, Exploratory Data Analysis, Statistical Inference, Regression Models, Practical Machine Learning.

2006–2011

#### **Bachelor's degree, Computer Science.**

University of Havana, Cuba.

- *Thesis*: Estimation of Distribution Algorithms Based on Copulas and Vines.
- *Selected Courses*: Linear Algebra, Calculus, Probability & Statistics, Design & Analysis of Algorithms, Operating Systems, Computer Networks, Database Systems, Artificial Intelligence, Information Retrieval Systems.
